The quality of the recovered original features completely corresponds to the quality of new original spare parts, including a worldwide warranty on parts, "Mercedes-Benz". We also take care of dismantling and assembling your items, if you so choose. And of course, do so without delay.

and work more efficiently.

For your assurance that the exchange of components is beneficial for your truck, restore all the original parts, Mercedes-Benz offered in more than 70 different product groups. In simplified form, all commodity groups can be divided into the following four categories of products:

- mechanical parts;
- details of the injection and subsequent purification;
- electrical and electronic components;
- aggregates (engines and transmissions).

The cycle of production of remanufactured parts:

Exchanged

Exchange with the maximum benefit.

Work cost-effectively: pay attention to quality. In the case of restoration of the original Mercedes-Benz parts your car will be renovated in exactly the same way as before him - the original Mercedes-Benz. It is provided by three factors:

Quality: The manufacturing process of restoration of the original Mercedes-Benz parts is subject to strict control and is carried out in several stages: from the complete disassembly into individual parts, followed by purification to a visual inspection, dimensional inspection and testing of electrical components - each unit is thoroughly tested.

If the item does not meet the specifications, modify and repair it.

and again the driver of his truck.

All worn parts are replaced with new ones.

Final tests of restored original details are held in accordance with the same rigorous standards, existing and new parts.

Reliability: All recovered the original Mercedes-Benz parts are checked by an equally strict criteria, and that the series produced parts. Our restored original features fully comply with the new spare parts in terms of functionality, efficiency and durability.

Warranty: Since the restoration of the original parts are not inferior in quality and reliability of the new spare parts, are covered by the same warranty as for components produced in series.

Exchanged

The exchange, which pays off right away.

Starters, brake cylinders, generators, turbochargers, cylinder head, high-pressure pumps, complete engines and transmissions: the fault is not to detain you for a long time, we always have in stock the most popular spare parts and remanufactured units Mercedes-Benz.

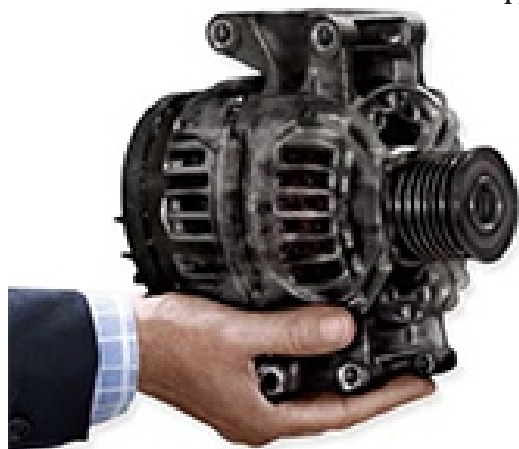

And if by chance the item is not in stock, your service center Mercedes-Benz will see to it that an appropriate item was delivered as soon as possible.

It may also have access to all available-restored original details Mercedes-Benz over the Internet.

and soon hit the road again.

In addition to being a corporate client Mercedes-Benz, the owner of an independent service or client with their own workshop, you can decide to order the necessary remanufactured parts through the Internet.

And all around the clock, regardless of the operating time.

Exchanged

The exchange, which is beneficial to everyone

Since each fault is different in origin, we offer individual sharing options even for complete units as engines and transmissions.

Depending on the type of defect, you can choose between a complete replacement engine or transmission, repairing or replacing individual separate units.

With the restoration of original features Mercedes-Benz, you'll also benefit from other advantages:

and the choice is yours.

- From price advantage to 50% compared with a new part.
- From the high, well proven quality restored original features.
- From high reliability in terms of functionality, performance and service life, corresponding to an equally strict standards as for new parts.
- From the official worldwide warranty, which is different from the current for mass-produced parts.

And finally, from the confidence that have made a significant contribution to environmental protection and conservation of natural resources through the use of the restored original details Mercedes-Benz.

Exchanged

Exchange of, which contributes to the protection of the environment

Since the restored original parts, Mercedes-Benz are not entirely new in the process of recovery requires less energy than the production of new parts.

In addition, the recycling of used parts also contributes to the conservation of mineral resources and reduce emissions. So for you, we have calculated environmental advantages of of restored of details by the following example:

In general, thanks to our production of of restored of details program saves up to 13 500 tons of natural resources per year.

and make harmless movement.

Add to this the energy savings 54,000 megawatt hours, which would be enough to meet the electricity needs of 17 000 households for a year.

Calculation example / saving materials recovery automotive V8 engine	
Reusing	47%
Restoration	32%
Disposing	11%

Exchanged

Your truck is designed for roads, not for idle in the repair shop.
