

in the muffler of a competing manufacturer: little sound insulation material

in original muffler "Mercedes-Benz": a lot of sound proofing material

## Our muffler fully correspond to its name.

A solid proposal: quality checking according to the rules of the German Technical Inspectorate TÜV demonstrates the advantages of the original muffler.

- + consistently low noise
- + ideal parameters back pressure in the exhaust system
- + high quality materials and high quality workmanship
- + long service life with high efficiency
- + sound-absorbing material, protected stainless steel
- + optimal precision mounting of connectors, quick installation
